UNITED INTERNATIONAL UNIVERSITY (UIU)

Dept. of Computer Science & Engineering

Trimester: Fall 2023
Course No: CSE 4451   Title: Human Computer Interaction   Section: A
Group Project Report: Milestone 1
Marks: 120
Submission date: **17ᵗʰ November, 2023**

We have been working on different parts of your final group project during class time. There are some documents and components that are partially prepared for you which can be used for this submission.

For this portion of the project, you should address the below areas in your report:

Topic	Marks
What is your team's specific problem statement? What is your team's specific user group? • Identify a target user group, and utilize your secondary research skills to identify problems that they might face. • Use citations to justify your problem statement, target audience, any necessary background, and the challenges they face.	20
Provide a detailed description of your data collection process • What research methods do you use? Why? • How do you reach out to your target user groups? • Briefly describe demographics of your participants. • What types of data are generated from your data collection process? • How do you record collected data? (e.g., notes videos, photos, audio recordings, memos, etc.) • Specify any challenges faced during data collection. How did you overcome those hurdles?	20
Briefly describe your data analysis process (you use the affinity diagram to analyze your data) • Mention the final insights that you gained from the affinity diagram. • What did you find out that you didn't already know? • What did you confirm that you suspected? • You have already created an affinity diagram on Miro, please share the link again with this report.	20
Provide at least 2 complete user personas	20
Provide at least 1 scenario and 1 storyboard	20
Submit peer evaluation form (Individual)	20
